

1. Who are in this team? Expected roles.

Project manager: Pavel

Front end: James Back end: Jani and Mahesh

2. What is this project about? Where your team focuses?

The project is about working in a team to create a web app for a event organiser for a future event programmes in Helsinki Business College.

3. What features are planned to be an MVP?

Users must be able to get event information, polls, FAQ section, feedback option and possibly information on travel routes.

4. What tech will you use?

JavaScript, CSS, PHP, HTML.

5. What software/platforms will you use?

Github, Figma, Trello, Git

6. What are your most significant risks? How will you solve those?

I think it is challenging to collaborate and communicate when working remotely in a team. We try our best to collaborate in MS teams and communicate effectively.
